Art Unit: 3726

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 14-15, drawn to a method, classified in class 29, subclass 895.
- II. Claims 8-13, drawn to a roller, classified in class 492, subclass 16.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and of Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method as claimed can be used to make another and materially different roll such as one for use in a press.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
